Kitty Kinninmonth — Large, ruffled, semi-uble flowers of clear pink.

Acclimated

Kitty Kinninmonth — Large, ruffled, semi-double flowers of clear pink.

Le Reve — Beautiful foliage. Semi-double yellow flowers.

Mermaid—Large single, sulphur-yellow flowers. Everblooming.

Mmc Gregorie Staechlin—Pink flowers with curled petals.

Paul's Lemon Pillar—White with trace of lemon. Large, well formed flowers. Best white climber.

climber.

Paul·s Scarlet Climber — Great clusters of bright scarlet flowers. Most used of all climb-

bright scarlet nowers. Most used of an elimbers.

Reveil Dijonnias—A remarkable new climber from Portland Test Gardens. A striking bicolored flower of golden yellow suffused with pink. Recurrent blooming. If you want an unusual beauty try this one. It is different. Scorcher—Large, ruffled semi-double flowers of blazing scarlet.

Silver Moon—Single white. One of rankest growing bushes known.

Sou de Claudius Denoyel—A fine red climber. Velvety crimson, recurrent bloom. Large flowers, well formed. A fine red climber.

PATENTED ROSES

We list a few of the patented varieties but can obtain almost any patent variety on short order. Prices of these are the same everywhere in the U. S., being controlled by the patentee. The fact that a variety is patented does not guarantee that it has merit. Some have and some do not. We list some of the better varieties.

Better Times—Brilliant cerise. Double, fragrant. Long stems.

Countess Vandal—Long pointed buds, coral pink.

Eclipse—Long stream-lined hand

Eclipse—Long stream-lined buds of golden

yellow. Golden Climber — Yellow, flecked with orange-scarlet. Vigorous.

McGreedy Triumph—Geranium-red flushed orange. Flowers large, full, perfectly shaped.

Rome Glory—Large crimson-red flowers on long stems. Vigorous.

Saturnia — Brilliant cardinal-red, reverse salmon-yellow and copper.

Signora—Orange cerise. Vigorous. One of most popular.

VINES

Clematis Montana—White flowers in spring. Clematis Paniculata—White flower in fall. Clematis Jackmani—Large flowering purple

flowers.

Clematis Ramona — Large flowering blue flowers.

Clematis Henryi — Large flowering white

wers. Boston Ivy—Clings to stone and brick. English Ivy—Evergreen. Clings. Belgian Honeysuckle Vine—Red and yellow

Nowers.

Silver Lace Vine—Rapid growing. White lacy flowers.

Trumpet Vine—Large orange-red flowers.

Wisteria—Grafted purple long-cluster type.

EVERGREEN SHRUBS

We have a very complete line of broad-leaf and conifer evergreen shrubs. Such shrubs must be moved with a heavy ball of dirt, which makes shipping expensive. While we sell large quantities of such stocks at our Salem salesyard, we do not list them for shipment. If interested write us of your needs and we will be pleased to quote.

BULBS

The most complete assortment of Bulbs in this region.

For Fall planting:

Tulips

Daffodils (Narcissus)

Yellow Newtown-Late. Fine keeper. High

Hyslop Crab Apple—Medium size. Striped. Transcendent Crab Apple—A fine crab.

Quick Bearing Varieties—Some varieties produce fruit much earlier in life than others. To get quickest results use Wagener, Jonathan and Yellow Delicious.

PEARS

No home orchard should be without Pears, both the summer canning varieties and the fine

both the summer canning varieties and the line keeping pears.

Bartlett—The great canning Pear. Ripens in August. High quality, If you can have but one pear choose Bartlett.

Bose—A long-necked, russeted pear, of highest quality. Ripens a month or six weeks after Bartlett.

Cayuga—A new highly recommended vari-

ety.

Worden Seckle—A high quality, winter dessert variety. Bears young.

Comice—A large late winter pear. Highest

quality.

D'Anjou—A winter pear of highest quality.

Seckle—Small, brownish-green. Finest quality.

Early winter.

Winter Nelis—Small. Russeted. Late keeper.

High quality.

Dwarf Pears—Pears on dwarf roots, make a smaller tree but a more productive one. Bear fine fruit. Fine for home gardens. We offer Bartlett only in four-year-old, bearing age trees. These trees fruited in the nursery this summer.

PEACHES
Varieties listed in approximate order of

Varieties listed in approximate order of ripening.

Mayflower—White juicy flesh. Earliest. For eating raw only.

Triumph—Semi-cling, Earliest yellow-meated peach. Heavy and regular bearer.

Golden Jubilee—A new freestone variety that ripens a little ahead of Rochester. Very promising.

Slappy—A yellow-meated freestone, One of highest quality canned.

Rochester—Hardiest of all peach varieties. A Crawford type ripening its first fruit a week or ten days before Early Crawford. No split pit fruits. A good canning and eating variety. Best peach in Puget Sound region.

Champion—A fine freestone, white meated peach.

Best peach in Puget Sound region.
Champion—A fine freestone, white meated peach.
Early Crawford—Most used peach in Oregon. Freestone, fine quality.
Charlotte—Very similar to Early Crawford but a few days later and considered by many to be more productive and a better peach.
Carmen—A high quality white meated peach.
Unexcelled for dessert use.
Eclipse—Another new yellow freestone that is very promising.
Southhaven—One of best of new varieties.
Freestone, bears young and heavily. Yellow flesh. Two weeks earlier than Elberta.
Valiant—A fine new freestone. Large, attractive fruit at about season of Early Crawford.
Vedette—A new variety of Elberta type.
Elberta—A fine commercial variety but too much leaf-curl for home plantings.
Improved Elberta—Best of all canning varieties but subject to leaf curl and requires careful spraying. Heavy bearer. Yellow freestone. A little earlier than the common Elberta.
J. H. Hale—One of most popular varieties.
Fruit very large. Productive.
Tuscan Cling—A yellow meat cling peach.
Massasoitt—New. Large, high quality, attractive. About Early Crawford season.
Muir—A yellow-meated freestone that is a fine canner.
Perfection—A very productive canning freestone. Fruit only medium size.

Please Read Before Ordering

OUR SEPARATE PRICE LIST COVERS ALL ITEMS IN THIS CATALOGUE WE GROW OUR OWN NURSERY STOCK HERE IN SALEM

Buy direct from the grower for best results. Grown under west of the Cascades itions, our stock is thoroughly ACCLIMATED TO WESTERN WASHINGTON AND OREGON CONDITIONS.

Why risk sending away for stock grown under different climatic conditions when you can buy ACCLIMATED STOCK, direct from GROWER, for less money than the usual price offered by outside selling organizations.

PLANTING SEASON:—Nursery stock does not ripen up thoroughly until about the middle of November. We dig and ship immediately that which is ripe, but WE DO NOT dig before mature, simply that we may beat the other fellow to shipments.

All the items listed herein can be planted from middle of November until late February or early March, depending upon the earliness of the spring. For best results plant before middle of February.

GUARANTEE:—We guarantee all stock to be true-to-name, free from disease and reach you in a live and healthy condition. However, we do not guarantee stock to grow under conditions over which we have no control. Should there ever be any complaint please make it as early as possible and it will be handled in a fair and square manner.

We exercise the greatest of care in delivering first class, true-to-name stock and hold ourselves in readiness to replace same when proven otherwise. But at no time will we be held liable for an amount greater than the original price.

Late Crawford — A large freestone that ripens about a month after Early Crawford. Salway—Ripens in early October. Large. Yellow flesh. Freestone.

NECTARINES

The Nectarine tree looks like a peach tree and the pit is like a peach pit. The skin, however, is smooth, like that of a plum. The flesh is rich and smooth and has a flavor all its own. A most delicious fruit that is little known here, but which will thrive wherever the peach thrives. Every home planting should have a Nectarine tree.

New Bov.

New Boy.
Stanwick—Leading Nectarine variety.
Quetta—Large, highly colored. Earlier than
Stanwick.

APRICOTS

Where given the full peach spraying program, Apricots will bear well in the region west of the Cascades. Handle like peach trees. Southwick—This is a local variety that has borne regularly for many years under Willamette Valley conditions. Original tree has been growing near Rickreall for over 50 years. Tilton—A large fruiting commercial variety. Wenatchee Moorpark—One of the leading commercial varieties of Eastern Washington.

SWEET CHERRIES

Bing, Lambert and Royal Anne require other varieties for pollenizers as they will not bear well planted either alone or with each other. We list several pollenizers below. Our cherries are all grown on mazzard root—the long-lived

are all grown on mazzard root—the long-lived root.

Bing—A large, solid black cherry. High quality. Ripens with Royal Anne.

Black Republican—Black fruit, smaller than Bing. Used largely as pollenizer for Bing, Lambert and Royal Anne.

Black Tartarian—Ripens earlier than main crop cherries. Used as a pollenizer.

Hoskins—A splendid pollenizer with fruit resembling that of Bing, but a little smaller. Lambert—Large, heart shaped, purplish-red fruit. Ripens after Bing. Better suited to west of Cascades conditions than Bing.

Royal Anne—Yellow with red check. The great canning cherry. Ripens ahead of Lambert.

great canning cherry. Ripens ahead of Lambert.

Waterhouse — A variety resembling Royal Anne, but softer. Used as pollenizer.

SOUR CHERRIES

Kentish (Early Richmond) — Medium size, red sour pie cherry. Ripens a little ahead of Montmorency. Used as pollenizer for Mont-

morency.

Late Duke—Large dark red, half-sour cherry ripening late in July.

May Duke — Medium size, red, half-sour, ripening early June.

Montmorency—The best of the pie cherries.
Bears heavily and young.

PRUNES

Italian — The great canning and drying prune. Medium size fruit. Ripens in September. The best canning of the plum family.

Petite (French) — Small fruited, sweet prune.

Date — A strain of Petites with larger fruit and larger pit. Good quality.

Imperial — Large, sweet, reddish-purple. Good quality. Plant with other prunes for pollenization.

Silver—Large, sweet, yellow. Late.

PLUMS

Plums—In approximate order of ripening. Beauty—Early, heart shaped, red. Good. Apex Plumcot—A cross between a plum and ricot.

Apex Flumcol—Artoss etween a pan and apricot.

Peach Plum—Large. Early.
Shiro—Medium size, yellow skin. Productive.
Santa Rosa—Purplish-red with amber colored flesh. One of best plums for local conditions. Quality high.

Burbank—Early. Productive. Good quality.
Green Gage—Green color skin and flesh.
Ripens late August. Good quality.
Wickson—Large, juicy, heart-shaped, red.
Satsuma—Red skin and flesh. Fine flavor.

Productive when planted with Burbank or other varieties.

Blue Damson—Small, blue skinned. Used largely for jam and preserves.

Bradshaw—A large blue mid-season plum.

Hungarian—Large, late. Purplish red. Fair cuplity.

NUT TREES

All the nut tree varieties listed herein are hardy under conditions prevailing west of the Cascades. Nuts are very easily grown and a complete assortment should be found in every home planting. If you grow them yourself you can afford to eat more nuts.

Franquette—This is the only variety of English walnut that is much planted. We offer grafted trees.

OUINCE

VARIETIES: PINEAPPLE, CHAMPION ORDER EARLY WHILE ASSORTMENTS ARE COMPLETE. A 20% deposit will hold your order till shipping time.

THE NEW ROYAL FILBERT

This introduction of our own is the largest filbert we have seen. Even larger than the largest Brixnut. Quality high. Percentage of meat much higher than Barcelona. Self husk-ing. A real filbert.

BRIXNUT FILBERT TREES

Brixnut is one of the newer filbert varieties. It produces large nuts and bears young and heavily. Its pollenizer is Halls Giant, another large round filbert. Our trees are all budded on Barcelona seedling roots.

Gassoway—A fine pollenizer for DuChilly.

Our Fig varieties will produce in the climate west of the Cascades. These varieties do not require pollenizers. Excellent for eating fresh as well as for preserves and cooking. Bear young. Plant on well drained soil.

Varieties: Latturula Honey — White fruit. Ripens two crops a year.

FILBERTS

FILBERTS

Tip-layered Filbert Trees—Many of the finest orchards are of the tip-layered trees. These have a lighter root than the transplanted types but if planted according to our instructions they will give excellent results and their price is low. We can supply Barcelona with DuChilly and Daviana pollenizers in this class of tree.

Transplanted Filbert Trees—These are a year older than the tip-layered types, being tip-layers that have been carried an additional year in the nursery rows. We advise Barcelona as a main crop with DuChilly, Daviana and White Aveline as pollenizers. If DuChilly is used as main crop use Gassoway and Daviana as pollenizers.

ALMONDS

Certain varieties of Almonds thrive west of the Cascades. The varieties we offer are soft shelled; as fine as anything you can buy in the stores. They are local varieties that have proven their bearing qualities under our climatic con-

BERRIES

Boysenberry—One of the most promising berries is the Boysenberry. This berry closely resembles Youngberry but is larger and more productive and its flavor is slightly different. Boysenberry starts ripening when Youngberry is about half through its season, thus lengthening the berry season. Boysenberry has been a sensation wherever it has fruited.

Youngberry—This is one of the finest berries grown. Delicious raw or in pies, jams, jelly or canned. Grows on a trellis like a loganberry. A dozen plants will amply supply the average family.

Ideal Wild Mountain Blackberry.

family.

Ideal Wild Mountain Blackberry—This is a domesticated form of the wild mountain blackberry. It is best pie berry grown. Has all the high quality of the wild berry and bears well.

Loganberry—Fine for pies, jams and canned.

Gooseberreis—Oregon Champion, the standard berry of the Northwest.

Perfection Currants—A large red currant.
White Grape Currant — Large clusters of white currants.

RED RASPBERRIES

Cuthbert — High quality. Less productive an some others. Chief—Hardiest of all. Early. Productive.

Fruit large.
Lloyd George—High quality. Produces fall crop also.
Latham—Hardy. Heavy bearer. Good qual-

ity.

Newbourgh—One of the newer varieties of red raspberries. Produces very heavily. Berries very large.

red raspberries. Produces very heavily. Berries very large. Taylor—New. A very heavy producer of enormous berries. Fine quality. Plum Farmer Blackcaps—A fine black rasp-

COMBINATION FRUIT TREES

These are trees with from two to four varieties of fruit on a single tree. Ideal for town lots where garden space is limited.

Apple Trees—These have from 2 to 4 varieties to the tree, in various combinations of eight leading homeorchard varieties. We try to develope a summer, a fall and a winter variety on each tree.

Cherry Trees—We offer trees with Hoskins and Royal Anne and with Hoskins, Royal Anne and Lambert. Hoskins is an excellent pollenizer and in addition produces a nice fruit that is very similar to Bing.

Plum-Prune—We can supply trees with Italian prune and from one or two plum varieties.

See price list for prices.

FALL BULBS

Tulips, Narcissus, Hyacinths, Crocus and many others, together with Peonies are described in our Fall Bulb Price List. Write for it. Free.
